

PRODUCT DATASHEET

6" Precision Flush Wire Cutters

Model CK-WC6 | Spring-Loaded Return | Integrated 10–20 AWG Wire Stripper
Standard handle colourway: black / safety-orange TPR grip — other handle colours available to order (OEM)

OVERVIEW

The Contractor Kit 6" Precision Flush Wire Cutters are a compact, spring-return hand tool for cutting, flush-trimming and stripping wire on site. The slim, angled jaw head is designed to reach into tight enclosures, back boxes and populated panels, while an integrated stripping notch covers 10–20 AWG cable without needing a separate stripping tool. A lightweight build and pouch-friendly size make it a practical addition to an electrician's, installer's or maintenance engineer's everyday tool kit.

KEY FEATURES

- 6" (160mm) flush-cut jaws for clean, burr-free wire ends
- Integrated wire stripping notch, 10–20 AWG
- Spring-loaded handle return for one-handed, low-fatigue use
- Angled jaw head for access in confined spaces and around populated boards/panels
- High-carbon (65Mn) steel blades with a hardened, heat-treated cutting edge
- Ergonomic PP/TPR non-slip handle grips
- Compact and lightweight — fits standard tool pouches and belt holsters
